Question The single question this work answers. If you cannot state it in one sentence, narrow the topic.

Method How you gathered evidence, and why that method fits the question.

Key findings Three to five findings, each stated as a claim with its supporting evidence.

What contradicts this Findings that point the other way. Reporting only what supports you is how a study becomes wrong.

Limitations Sample size, method constraints, and what you could not control.

Sources Every source with its date and how you used it.
