

# FLEXGRID

Federated Learning for EXtended Grid resilience and  
Intelligent Demand-response

## Proposal Key Facts

|                            |                                 |                       |                                        |
|----------------------------|---------------------------------|-----------------------|----------------------------------------|
| Duration:                  | 36 months                       | Type of action:       | Innovation<br>Action (IA)              |
| Requested EU contribution: | €5,980,000                      | Consortium size:      | 6 beneficia-<br>ries, 5 coun-<br>tries |
| Coordinator:               | Nexa Dy-<br>namics B.V.<br>(NL) | Start date (planned): | 1 January<br>2027                      |
| TRL progression:           | TRL 4 →<br>TRL 7                | Panel:                | HORIZON-<br>CL5-2026-<br>D3            |

Coordinating person: Dr. Elena Marsh |  e.marsh@nexadynamics.example |  +31 20 555 0142

This document is a full proposal submitted under the Horizon Europe Work Programme 2026–2027.

Consortium: Nexa Dynamics (NL) • Synapse Analytics (DE) • Vertex Materials Institute (IE) • Nimbus Grid Systems (FI) •  
Apex Photonics Lab (SE) • Meridian Energy Cooperative (ES)
